

CVEN is the result of VIBE's R&D team's passion and creativity. We created the car audio we wanted, with no limits on budget, no market constraints and innate access to all materials & engineering knowledge CVEN wasn't made for you, it was made by us for us, shared with you.

CVEN10DSP-V5
ULTIMATE TUNING POTENTIAL

Our R&D team have extensive experience of what makes a great DSP. Using our own hands on approach to DSP development we soon exhausted every product available from vendors across the globe and set about developing our own product from the ground up. Our initial starting point was simple. Create a user interface that was intuitive with an extensive options list. To not only help the novice installer build their skills, but also include enough options to satisfy the experts. A single user interface and DSP design which could be added to full catalogue of products.

That means that our community of installers and consumers need only learn and understand one platform across a number of products. We are proud to release this new DSP design which will be available in entry level plug and play amplifiers all the way through to specialist stand alone DSP designed for SQ tuning and competition installation.

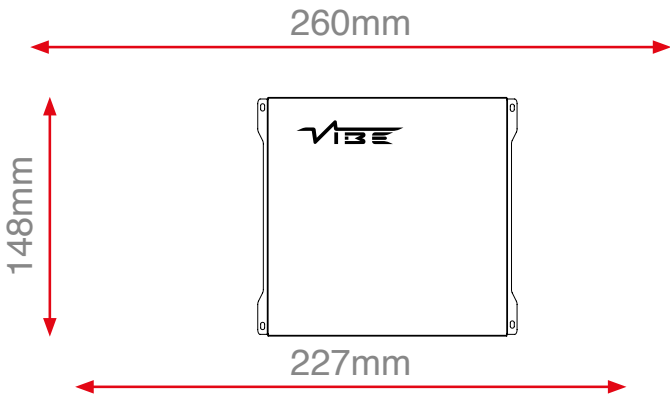

ULTIMATE CONTROL:
Turn any system into a wirlessly controlled digital powerhouse using the vibe CVEN10DSP

CAREFULLY ENGINEERED:
Digital High-Res 10 channel signal processor with multiple internal memory locations for sound setups, changed using the app.

FEATURE RICH:
Optical input , remote out, app control and powerful internal proccesor allows for power users to get the most from the DSP. assembly whilst reducing lost performance due to resonance of the basket assembly.

Model	CVEN10DSP-V5
Type	DSP Chnl Processor
Dimensions	2.4" x 25.5" x 11.4"
Low Level Input	8
High Level Input	8
Low Level output	10
Digital Input	Optical + Coaxial + Bluetooth
Freq. Response	20Hz -25kHz
Crossover Type	LP / HP / BP / FLAT
Crossover Range	20Hz - 20kHz

QUICK RELEASE CONNECTIONS

Quick release power, ground, remote and high level connections for a simplified install into your vehicle.

BEST DESIGN

rugged materials, powerful internal proprocessor and unique intuitive smartphone app.

AUDIOPHILE

part of VIBE's uncompromising Sound Quality collection, engineered in the UK for listeners who refuse to settle.

DSP EXTRA FEATURES

- 1/3 Octave 31 band parametric equaliser with variable Q factor
- Channel Time alignment
- LP/BP/HP/ Crossover with adjustable slope and alignment
- Ground lift switch for setting ground configuration in case of alternator whine or interference issues
- Input source selection
- Channel phase adjust
- Optical input for a source with TOSLINK optical digital output
