

## EDBXPRO69W-E2 PRO AUDIO MIDRANGE SPEAKER

The EDBXPRO69-E2 is the EDGE DBX series 9 Inch 300 Watts Pro Audio Midrange Speaker.

Using all the experience and information we gathered from the development of the DB Series speakers, the DBX Series are an advancement in performance, with subtle engineering changes, increased magnet sizes, redeveloped voice coils with precision designed spiders and cones to produce loud efficient sound.

|                 |                    |
|-----------------|--------------------|
| Model           | EDBXPRO69W-E2      |
| Type            | Boadband           |
| Size            | 6 x 9" (15 x 23cm) |
| Number of bands | 1                  |
| Rated Power     | 150W               |
| Max. Power      | 300W               |
| Frequency Range | 55 - 22000 Hz      |
| Sensitivity     | 91dB               |
| Mounting Depth  | 91mm               |
| Impedance       | 4 Ohm              |

- WIDEBAND FREQUENCY RESPONSE: The speaker is efficient with wideband frequency response.
- NON PRESSED PAPER CONE: The paper cone allows highly efficient sound from the speaker.
- DUAL FOAM SURROUND: This feature means the speaker is loud and clear.
- SPADE TERMINAL: The speaker has easy power and volume control with fast turn on.

### SPADE TERMINAL

This allows for ease of installation for the speaker.

### FOAM

The foam surround allows for fast, precise damping of cone.

### WIDEBAND

The frequency response is a high range this means that a better directional sound is made.

### PAPER CONE

The paper composite cone allows for a lightweight efficient cone, as well as a rich accurate sound.

### EVA GASKET

The speaker has custom tooled and stamped EVA gasket.

### POLY COTTON SPIDERS

The speaker has the feature of poly cotton spiders.
