Speaker Installation Guidelines

Firstly, make sure that the speakers will fit in your chosen location. This may involve the removal of the standard vehicle speakers. Please use the mounting depth and hole cut dimensions as detailed in this manual for guidance.

- If necessary cut any material away to allow the speaker to sit correctly.
- Cut out the mounting hole and pre-drill any other fixing holes.
- Screw through both gasket and speaker until the speaker is securely fastened.

Speaker Installation

Find a suitable mounting location for the speaker.

Mark the mounting holes and pre drill the fixing hole with a 2mm drill bit.

Be careful not to over tighten the screws as it may cause damage to the speaker.

Please follow the wiring diagrams and ensure that correct polarity is observed as incorrect wiring may cause the speakers to be out of phase with the rest of the system and result in a loss of bass.
