

EDP152SPL-E3
STREET SERIES SUBWOOFER

Unleash the power of music with EDGE's Street Series subwoofers. Built from the ground up for powerful bass performance, these subwoofers deliver deep, resonant sound that shakes your core. The double-stacked magnets generate immense magnetic force, allowing for high levels of excursion and SPL. With polycotton spiders, non-pressed paper cones, and stitched tinsel leads, these subwoofers are designed for durability and performance

The EDP152SPL-E3 boasts a newly designed one-piece dustcap, direct leads for heavy-gauge wiring and a matching reinforced torsion basket to its bigger brothers in the EDP subwoofer range.

Model	EDP152SPL-E3
Type	Subwoofer
Speaker Size	15" (381mm)
Peak/RMS Power	2000W/1000W
Sensitivity	83dB
Frequency Response	20-Hz - 650Hz
Impedance	Dual 2Ω
Mounting Depth	205mm
Mounting Diameter	362mm
Enclosure Volume	2 - 3ft3

BEST SOUND - Double stitched High roll foam surround and paper composite cone make for lightweight but strong soft parts allowing for massive output from these subwoofers.

PREMIUM DESIGN - Brand new custom tooled 2 piece dustcap with edge outline logo making for a premium looking subwoofer.

GREAT SOUND - Powerful motor assembly with triple stacked Y35 magnets provides strong motor force for providing deep punchy bass.

BEST POWER HANDLING - The 3" voice coil and custom designed soft parts result in great power handling for the 15" driver.

PAPER COMPOSITE CONE

Strong non-pressed paper cone to deliver extreme levels of SPL.

DUAL VOICE COIL

Dual voice coil subwoofer with direct leads for flexible wiring options as well as the option to use large gauge speaker wire when connecting to the subwoofer.

JUMBO FOAM SURROUND

Huge wide roll foam surround to cope with large amounts of excursion.

3" VOICE COIL

High temperature 3" voice coil made in the USA for increased power handling

STITCHED

Double stitched surround delivers an Unparalleled mechanical bond between the cone and surround.

TORSION BASKET

Brand new custom tooled torsion basket made from cast aluminum for extreme rigidity, supporting the massive moving motor parts.
