

EDS15D2-E3

STREET SERIES SUBWOOFER

Introducing the trunk thumping Street series subwoofers from EDGE. The Street series subs have been designed from the ground up to produce awesome musical bass, using double stacked magnets to generate large magnetic force we are able to control the subwoofer with pin point accuracy while maintaining a high level of excursion and SPL. Using polycotton spiders, non-pressed paper cones and stitched tinsel leads, we are able to create a high quality product that produces accurate loud bass.

All models have built in active crossovers and bass boost and can be used to power subwoofers, midrange drivers or tweeters. For anyone looking for hard hitting street bass look no further than our Street series subs.

Model	EDS15D2-E3
Cone	Non pressed cone
Surround	Big roll foam - stitched
Dustcap	Part IMPP
Voice Coil	45mm copper winding
Spider	2 pcs Black PC
RMS Power	1850 Watts
Peak Power	3700 Watts

PAPER CONE - The semi pressed paper composite cone delivers outstanding clarity.

FOAM - The foam surround offers fast, precise damping of the cone.

VOICE COIL - The voice coil means that there is increased power handling.

MAGNET - With double stacked magnets large magnet force is generated which allows control for the subwoofer.

FOAM SURROUND

.The foam surround offers fast and precise damping of the cone.

VOICE COIL

The subwoofer has a 3 Inch black aluminium voice coil.

MAGNET

The subwoofer has dual Y35 ferrite magnets.

POLYCOTTON SPIDERS

The black polycotton spiders mean that the product is high quality and can produce loud bass.

PAPER CONE

The non pressed paper cone aids the subwoofer and means that it is a high quality product.

ACTIVE CROSSOVER

The subwoofer has an active crossover feature.
