

EDGE STREET COAXIALS
Refined Performance

For our all new EDS series speakers, our R&D engineers set the goal of creating the best sounding speakers we have ever made. A combination of precision engineering, perfectly balanced components and endless testing and tuning. As well as building open much of the design benefits of out latest pro speakers. Everything packaged together results in the new EDS coaxial speaker range from EDGE.

Engineered for efficiency and elegant sound reproduction. Featuring oversized tweeters on all coaxial speakers in the EDS range we utilise an oversized tweeter. This is either 40mm or 50mm in comparison to a market standard of 20-30mm. This oversized tweeter beats other 2/3/4 way coaxial designed as the larger PEI tweeter membrane allows for more of the directional sound to be produced from the tweeter as its wide bandwidth stretches further into the range than a standard coaxial.

Model	EDS4-E4	EDS5-E4	EDS6-E4	EDS69-E4
Type	Coaxial	Coaxial	Coaxial	Coaxial
Configuration	2-Way	2-Way	2-Way	3-Way
Speaker Size	5" (100mm)	5" (130mm)	6.5" (165mm)	6x9" (150x220mm)
Peak/RMS Power	160W/80W	180W/90W	200W/100W	320W/160W
Freq.Response	100Hz - 20kHz	80Hz - 20kHz	65Hz - 20kHz	45Hz - 20kHz
Impedance	4Ω	4Ω	4Ω	4Ω
Mount Depth	1.6" (40mm)	1.8" (46mm)	2.4" (61mm)	3.1" (79mm)
Mount Dia	3.7" (93mm)	4.4 (112mm)	5.6" (141mm)	145mm x 215mm
Grille	Yes	Yes	Yes	Yes

BEST SOUND - High power with a smooth midbass and vocal reproduction this speaker is a significant upgrade over factory speakers.

BEST TECHNOLOGY - Featuring an oversized PEI tweeter a and a large ferrite magnet for an enhanced sound.

GOOD FITMENT - Our new EDGE street speakers feature a multi-fit basket design allowing fitment in most vehicles..

BEST STYLING - Featuring a stealthy black look with signature edge orange accents these speakers are able to integrate into many vehicles while still looking good with there striking design.

FOAM SURROUND

foam surround for greater control of the cone offering smoother bass reproduction.

COAXIAL

Coaxial speaker set with the midrange and tweeter paired into one unit resulting in less wires, offering a full range sound all from a single location.

FEMM MOTOR

Large high power motor for strong motor force, allowing for great power handling and increased ease in reproducing lower notes.

SPADE TERMINAL

Spade terminal for quick and secure connections to the speaker.

PAPER COMPOSITE

Strong specially formulated paper composite cone for a rich and warm sound reproduction.

STEEL MESH GRILLE

Steel mesh grille protects the speaker from damage.
