

EDXPRO6N-E5
PRO MIDRANGE

The EDX Range just got a new entry.

The new Xtreme Pro midrange drivers push the boundaries of what’s possible from a midrange driver at its price point. Featuring high-power Neo (Neodymium) motors for extreme motor force, as well as a much smaller and lighter magnet, perfect for installations with multiple drivers per door. The smaller and lighter motors help keep the weight of the door card down, as well as allowing it to be physically smaller due to a shallower mounting depth, further decreasing weight.

The midrange drivers do not compromise on technology, featuring a dual roll accordion foam surround for extra mid-range response as well as a carbon dustcap for increased rigidity. Paired with a paper composite cone that leaves nothing to be desired, it outputs rich vocals and a loud PA-style sound without being overly harsh.

These Neo EDX drivers are not just extreme they are the future of Car Audio.

Our Pro Audio Drivers aren designed to give you a crystal clear pro sound, all day , everyday. Designed to to handle the most xtreme installs and use without skipping a beat

High sensitivity driver turns more of your apmplifier power into that pro sound you know and love. These speakers are great at making the most of all the input power they get.

Powerful Neo (Neodymium) offers extreme motorforce, meaning better cone control and better sound. With the benefit of a physically smaller size.

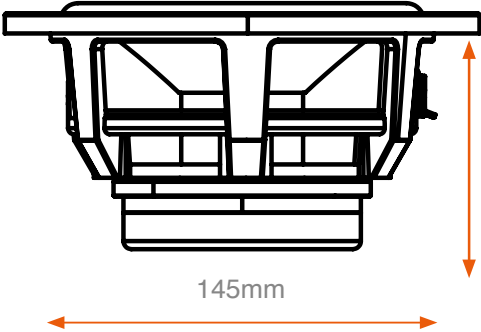

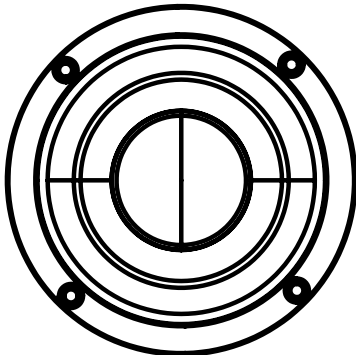

Quick release spade terminals for secure and faster speaker wire connections to the speaker.

PREMIUM CONSTRUCTION - Featuring alloy basket for increased tensile strength supporting the moving parts of the motor assembly whilst reducing lost performance due to resonance of the basket assembly. A carbon dustcap for extra cone rigidity, meaning the whole speaker is braced for the ultimate performance

BEST DESIGN - Shallow Mount design as a result of the NEO Motors mean this speaker can fit in pro installs where space and weight are near their limits. The NEO motor helps the driver outperform drivers that are significantly larger in size.

BEST PERFORMANCE - The performance of the new EDX Midrange is for those who need the most extreme sound and volume, perfort for large audio systems.

Model	EDXPRO6N-E5
Type	Midrange
Speaker Size	6.5" (165mm)
Peak/RMS	500W/250W
Sensitivity	96dB
Freq. Response	80Hz - 14kHz
Impedance	3.2 Ω
Mount. Depth	60mm
Mount. Dia	145mm
Grille included	No

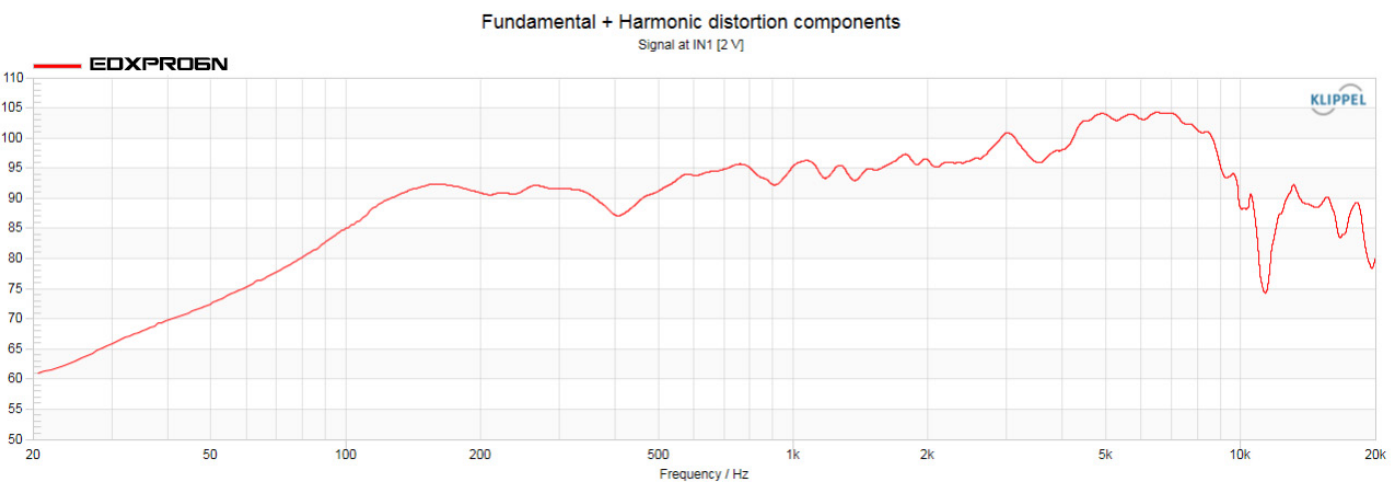

167 mm

60 mm

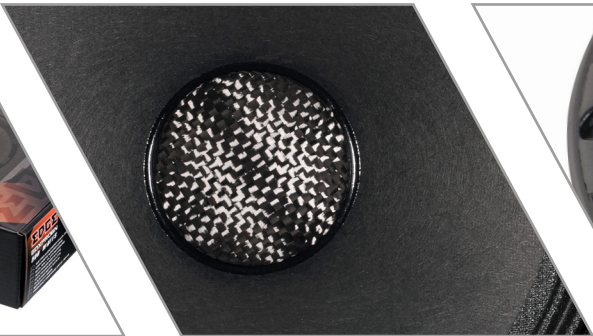

145mm

6"

SHALLOW MOUNT DESIGN

Designed to work in all builds where sometimes there isnt the extra depth to mount mutiple large pro midrange drivers.

BEST DESIGN

Rugged materials, NEO motor and precision-wound coil for maximum clarity and cooling

PRO AUDIO

Pushing the limits of whats possible for a midrange driver this speaker offers a unique pro sound that is an experience to listen to.

TS PARAMETERS

- RE - 3.24 OHM
- LE - 0.022 mH
- L2 - 0.235 mH
- R2 - 1.69 Ohm
- Cmes - 185.29 uF
- Lces - 9.42 mH
- Res - 22.04 Ohm
- Fs- 120.4 Hz
- Mms - 9.870 g
- Mmd (Sd)- 8.019 g
- Rms - 2.416 kg/s
- Cms - 0.177 mm/N
- Kms - 5.65 N/mm
- BI- 7.298 N/A
- Lambda s - 0.079
